

## **TECHNICAL DATA SHEET**

# **KILBLAT™**

# Non-Flammable Aircraft Approved Insecticide for Crawling Insects

### **DESCRIPTION**

KILBLAT™ is a non-flammable aircraft approved insecticide used during line maintenance to eliminate cockroaches and other crawling insects on board. KILBLAT™ is particularly suitable for treating aircraft cabins, holds, galleys, cupboards and all exposed areas.

### **FEATURES & BENEFITS**

- Specially designed to effectively destroy crawling insects.
- Non-flammable aircraft approved formulation.
- Slow release active, providing long lasting effect over time.
- Applied "upside down" to target the areas to be treated.
- One-shot diffuser for easy application.

### **APPROVALS**

- AMS1450
- Boeing D6-7127
- Airbus CML 11ACB1-A

#### **PREPARATION**

- Wet locations and presence of food are favourable conditions for cockroach development. In order to obtain maximum efficiency, it is necessary to carry out a deep cleaning of the aircraft prior to applying KILBLAT™.
- All bins must be empty and taken out of the aircraft.
- No food is to be present on board during the treatment.
- Only skilled staff carrying out the treatment should be on board.

#### **DIRECTIONS FOR USE**

- The aircraft must be unoccupied, the doors closed and bins empty.
  Only staff carrying out the treatment should be on board. After application, a 30 minute waiting period must be observed before returning to the aircraft.
- Start the treatment from the side furthest from the open exit door.
- Do not forget rails, spaces behind trolleys and trolley wheels.
- Shake can well before use.
- Hold the spray "upside down".
- **Single-shot continued spraying** (for easier application): Press hard on the actuator until it locks. The spray will be continuous until the aerosol can is depleted. Aerosol is not intended to be left in the cabin without operator.
- Multi-shot spraying: Press lightly on the tab without locking it. Release to stop spraying.
- Use aerosol at a distance between 20-30cm away from the surface to be sprayed.

# **TECHNICAL DATA SHEET**

- Spray the surfaces to be treated in a grid pattern, insisting on the places frequented by insects (damp areas or where there is food).
- One KILBLAT™ 400g aerosol can treat up to 40m² of surface (10 to 12g/m²).
- After the waiting period, surfaces potentially in contact with food must be cleaned and rinsed.
- For first application or in the case of an infestation, the procedure must be repeated 3 times, with a 2-week interval: day 0, day 15 and day 30. Product can then be applied every 2 to 3 months for maintenance.

Use biocides with caution. Before use, read the label and information concerning the product.

#### ORDERING INFORMATION

Product code	Product	Units/Carton
5165/400	KILBLAT 400g Aerosol	12

#### **WARNING**

Pressurised container: May burst if heated. Very toxic to aquatic life with long lasting effects.

#### **PRECAUTION**

Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No Smoking. Do not pierce or burn, even after use. Avoid release to the environment. Collect spillage. Protect from sunlight. Do no expose to temperatures exceeding 50°C/122°F. It is recommended to wear protective gloves, eyes and clothes protection during the use of the product.

#### STORAGE AND DISPOSAL

Store in a cool, dry, ventilated place. Keep out of reach of children. Dispose of contents/container in accordance with local regulation.
